Ingo Sander (KTH)

Velcome to IL2206 Embedded Systems

1 / 18

# About the course responsible...

- Background
  - Professor in Electronic System Design
  - Languages (in that order): German, Swedish, English
- Research Interests
  - Embedded System Design Methodologies
  - Embedded System Architectures
  - Embedded Software
- Web Page
  - https://people.kth.se/~ingo/

#### **Course Contents**

- Main focus lies on design of embedded real-time systems
- Lectures focus on theoretical concepts
- Seminars focus on the design process
- Laboratory course supports selected theoretical concepts

Ingo Sander (KTH)

Welcome to IL2206 Embedded Systems

2 / 10

## Intended Learning Outcomes

- Having passed the course, the student should be able to
  - describe the fundamental structure of the platform for embedded computer systems and explain the cooperation between the software and the hardware components (ILO A)
  - analyse how architecture and implementation decisions influence the performance in an embedded system (ILO B)
  - use basic models and analytical methods for embedded realtime systems (ILO C)
  - develop software for simple embedded real time systems (ILO D)
- Examination
  - ILO A-C are examined in the written exam in individual parts
  - ILO D is examined in the seminars and laboratories

## Course Requirements

- Grading system A-F
  - A-E (passed), F (failed)
- To pass the course the student has to fulfil the following requirements:
  - Complete the seminars and the labs and have them approved by the course assistant. Please note, that in order to attend the laboratories all preparation tasks have to be completed!
  - Pass the final exam. The grade for the exam will also be the grade of the course, assuming the labs and exercises have been completed as required.

Ingo Sander (KTH)

# Course Requirements

- Grading system A-F
  - A-E (passed), F (failed)
- To pass the course the student has to fulfil the following requirements:
  - Complete the seminars and the labs and have them approved by the course assistant. Please note, that in order to attend the laboratories all preparation tasks have to be completed!
  - Pass the final exam. The grade for the exam will also be the grade of the course, assuming the labs and exercises have been completed as required.

## Course is on advanced level!

For many students, this course is maybe the first course at master level. Please check the qualitative targets (examensmål) for master programs in Sweden.

## Course Staff

- Course Responsible and Examiner
  - Ingo Sander
- Lectures
  - Ingo Sander
- Laboratories
  - Rodolfo Jordao, Rui Chen, Fahimeh Bahrami, Thilanka Thilakasiri
- Seminars
  - Ingo Sander, Rodolfo Jordao, Rui Chen, Fahimeh Bahrami, Thilanka Thilakasiri

Ingo Sander (KTH)

6 / 18

## Course Structure

- 17 lectures including
  - Tutorial on laboratory environment
  - Exercises as part of the lectures
- 2 mandatory laboratories in 3 lab sessions
  - Students work together in groups of two. However each student has to understand all parts of the lab.
  - Each student has to individually complete the preparation tasks before the lab session!
  - There are several sessions for each laboratory
- 2 mandatory seminars
  - Students work alone
  - Each student has to individually complete the preparation tasks before the seminar session!
  - There are several sessions for each seminar

Expected average work load: 200 hours (7.5 hp)

Ingo Sander (KTH)

Welcome to IL2206 Embedded Systems

7 / 18

## **Exams**

- Exams (graded), please double-check dates!
  - Final exam: at end of period 1
  - Only one re-exam: at end of period 2 (before Christmas)
- Exam contains three parts A, B, C (individual part per intended learning outcome)
- All parts must be passed to pass the exam

# ndermation Properties (Page 1988) Petailed Exam Information

More information in Canvas and the Course-PM

Ingo Sander (KTH)

#### Laboratories

- A laboratory consists of 2 students
- Several sessions per lab
  - Register for a session in KTH Canvas
  - Each student has to register, i.e., lab partners must register for the same session.
  - Come to the session you registered for, otherwise you will neither be guaranteed a seat nor time with the lab assistant!
- Most of the laboratory is preparation, i.e., to be done before the lab session!
- Find a lab partner and start as soon as possible!

#### Laboratories

- A laboratory consists of 2 students
- Several sessions per lab
  - Register for a session in KTH Canvas
  - Each student has to register, i.e., lab partners must register for the same session.
  - Come to the session you registered for, otherwise you will neither be guaranteed a seat nor time with the lab assistant!
- Most of the laboratory is preparation, i.e., to be done before the lab session!
- Find a lab partner and start as soon as possible!

#### N Good individual preparation is required

- 1 Laboratories require significant preparation work!
- Every student has to understand the full laboratory

Ingo Sander (KTH)

#### **Seminars**

- Individual work
- Several sessions per seminar
  - Register for a session in KTH Canvas
  - Each student has to register for a seminar session
- Seminar has preparation tasks, which have to be completed in time
  - reflection exercise
  - 2 feedback on reflection exercises

## Virtual Machine and FPGA Boards

- DE2 FPGA-boards will be distributed later in the course to be used in laboratory 2
- A virtual machine (VM) will be used in the course for the software used in the labs
- Follow the instructions in Canvas to download the VM

# Cheating and Plagiarism

# Cheating and Plagiarism

Suspected cheating shall be directly reported by the teaching staff to report to the KTH president, which gives rise to a disciplinary matter with possible serious consequences for the student.

#### KTH Canvas

- We will use Canvas in the course. You can log in with your KTH id after you have been registered
- All questions to the course staff should be send via the KTH Canvas
- You can also use the KTH Canvas discussion forum between students
  - Students can help students and many small problems can be solved without consulting the teaching staff!

Ingo Sander (KTH)

### KTH Canvas

- We will use Canvas in the course. You can log in with your KTH id after you have been registered
- All questions to the course staff should be send via the KTH Canvas
- You can also use the KTH Canvas discussion forum between students
  - Students can help students and many small problems can be solved without consulting the teaching staff!

#### Questions?

For questions, please use the discussion forum in Canvas!

#### Course Material

- The main reading material are the lecture notes, which are available via Canvas
- There is no textbook available that covers the material of course
- The course gives links to online resources (book chapters, industrial documentation, articles, . . . )
- Good knowledge of programming language C is required

Ingo Sander (KTH)

Welcome to IL2206 Embedded Systems

14 / 18

## Contact with Course Staff

- The lecturer is usually available for question during the break and up to 15 minutes after the lecture. Please use this time for questions.
- Before you send an e-mail, please check the course web page on KTH Canvas. Maybe there is already an answer to your question.
- If you anyhow feel, you need to send an e-mail
  - Please check that you send the e-mail to the right person or mail-list.
  - Use your KTH mail address so that we know that you are a KTH student.
  - Start the subject with "[IL2206] ..." so that we know that is about the Embedded Systems course.
  - Please make sure that your e-mail has a very clear message. This will save a lot of time!

# Changes due to Covid-19

- Due to Covid-19 restrictions apply and the course cannot be conducted in the same way as in previous years
  - Maximum number of students in a lecture room is restricted, and distance needs to be ensured!
  - New restrictions or regulations can arise due to Covid-19
- Initial plan for IL2206 Embedded Systems:
  - Lectures in the classroom with limited number of students and online-streaming
  - Seminars will be conducted online
  - Laboratory session 1 will be conducted online
  - Laboratory sessions 2 and 3 with well-defined schedule in smaller groups in class room
- We will continuously check, if this model can fulfil the restrictions due to Covid-19.
- Please cooperate and keep distance!

Ingo Sander (KTH)

# Before I forget...

- Read the course web page and the course-PM in Canvas
  - All important information is contained there
- Laboratory and seminar registration will open in a few days
  - Select a laboratory and seminar group for each lab session in Canvas

Ingo Sander (KTH)

Welcome to IL2206 Embedded Systems

# IL2212 Embedded Software

- Embedded Systems course should not be viewed in isolation
- Follow up-course: IL2212 Embedded Software
- Many software-related topics are discussed in that course!
